

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	28 October 2022
Team ID	PNT2022TMID48003
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement	Sub Requirement (Story / Sub-Task) (Epic)
FR-1	User Registration	Registration through Form Registration through email Registration through Social Media Sites
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Clarification	After the donor donates plasma, we will give them a certificate of appreciation and authentication
FR-4	Statistical data	The Statistical data about the usage of the plasma donor application displayed in the application
FR-5	User Plasma Donation	The users can request to donate plasma by filling out the request form on the page. Once the request is submitted, they will get an email
FR-6	Request	Recipient request for plasma the user requesting plasma
FR-7	Searching/reporting	Users can look up information about camps and requirements other topics in the Information section.
FR-8	Virtual Assistants	A virtual assistant is a software agent that provide services Of a person in response to commands or inquiry. the user Easily register for donating/requesting the plasma

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should be user friendly and good-looking user-interface and should be easy to use the application
NFR-2	Security	The security requirements deal with the primary security. Only authorized users can access the system with user name and password of administrator
NFR-3	Reliability	If any information is inaccurate it will cause big issues. The application should be made in such a way that it is reliable in its operations and for securing the sensitive details
NFR-4	Performance	The performance of the application is more important than that the user should not face any lag or problem regarding application. So, the performance of the application should be high
NFR-5	Availability	The availability of the application should be anytime. The user can use the application in emergency whenever it can be. So, the application should work 24/7
NFR-6	Scalability	The application has the ability to handle growing numbers of users and load without compromising on performance and causing disruptions to user experience
